Active Noise Control of Speech in Headphones
using Linear Prediction

16. december 2016

Kasper Kiis Jensen, Maxime Démurger
Oliver Palmhøj Jokumsen, Christian Claumarch
Mikkel Krogh Simonsen
16gr761@es.aau.dk

Acoustics and Audio Technology - Fall 2016
Department of Electronic Systems
Aalborg University
Denmark

AALBORG UNIVERSITY
DENMARK

Agenda

Introduction
What is Active Noise Control (ANC)
Present consumer headphones
Methods
Adaptive Filtered-x least mean squares FIR algorithm
Wiener filtering
Results
Simulation
Discussion
Computation
Conclusion
Listen

Introduction

- What is Active Noise Control (ANC)
- Present consumer headphones

Methods

- Adaptive Filtered-x least mean squares FIR algorithm
- Wiener filtering

Results

- Simulation

Discussion

- Computation

Conclusion

- Listen

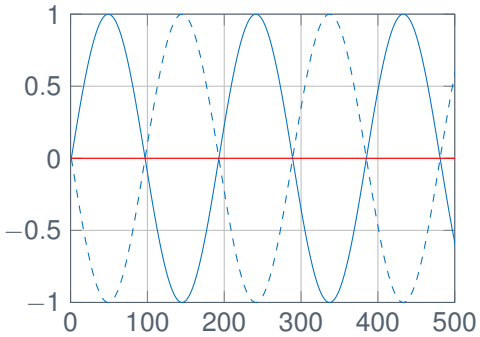
Active Noise Control of Speech in Headphones using Linear Prediction
Group 761
Introduction
What is Active Noise Control (ANC) 2
Present consumer headphones
Methods
Adaptive Filtered-x least mean squares FIR algorithm
Wiener filtering
Results
Simulation
Discussion
Computation
Conclusion
Listen

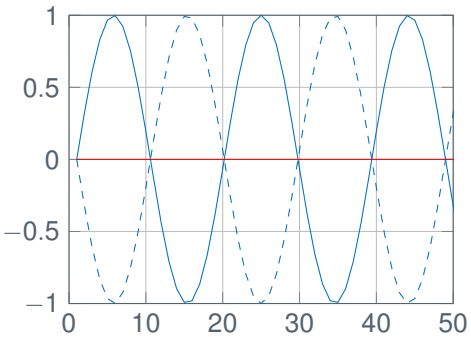
- Counterphase signal

Active Noise Control of Speech in Headphones using Linear Prediction
Group 761
Introduction
What is Active Noise Control (ANC) 3
Present consumer headphones
Methods
Adaptive Filtered-x least mean squares FIR algorithm
Wiener filtering
Results
Simulation
Discussion
Computation
Conclusion
Listen

- Frequency dependent attenuation

— Original signal
- - Counterphase signal
— Error



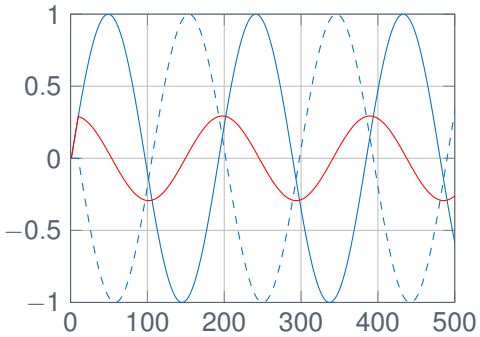


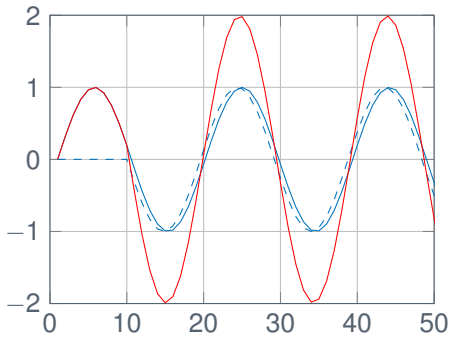
Acoustics and Audio Technology
Dept. of Electronic Systems
Aalborg University
Denmark

Active Noise Control of Speech in Headphones using Linear Prediction
Group 761
Introduction
What is Active Noise Control (ANC) 4
Present consumer headphones
Methods
Adaptive Filtered-x least mean squares FIR algorithm
Wiener filtering
Results
Simulation
Discussion
Computation
Conclusion
Listen

- Frequency dependent attenuation

— Original signal
- - Counterphase signal
— Error



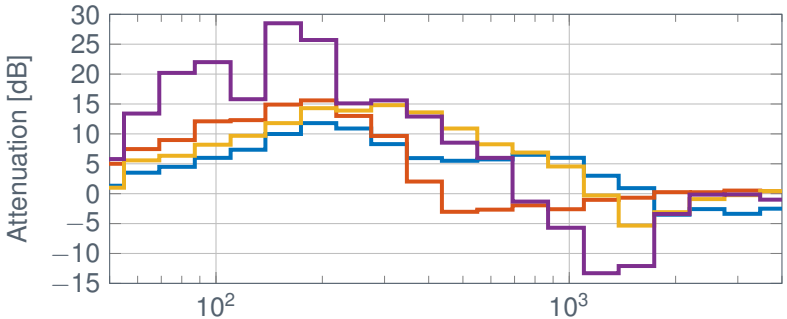


Active Noise Control of Speech in Headphones using Linear Prediction
Group 761
Introduction
What is Active Noise Control (ANC) 5
Present consumer headphones
Methods
Adaptive Filtered-x least mean squares FIR algorithm
Wiener filtering
Results
Simulation
Discussion
Computation
Conclusion
Listen

- Conversion delay

Active Noise Control of Speech in Headphones using Linear Prediction
Group 761
Introduction
What is Active Noise Control (ANC)
Present consumer headphones
6
Methods
Adaptive Filtered-x least mean squares FIR algorithm
Wiener filtering
Results
Simulation
Discussion
Computation
Conclusion
Listen

- How well does the consumer headphones attenuate?
  - Denon AH-GC20 2.200 kr (2016)
  - Bose QC25 2.799 kr (2016)
  - Bose QC15 2.696 kr (2011)
  - B&O H8 3.495 kr (2016)



Active Noise Control of Speech in Headphones using Linear Prediction

Group 761
